

GREENLIGHT HEPATITIS C – BABY BOOMERS

HCV test for ALL patients born between 1945-1965

TEST → IDENTIFY → REFER → CURE

WELCOME:

We are pleased to announce the launch of the “**GREENLIGHT Hepatitis C**” project. **GREENLIGHT Hepatitis C** will provide guidance and information for step-by-step development of hepatitis C testing, patient identification, linkage to **CURE** and long-term support for those affected by hepatitis C and the people who care for them.

We really need your feedback on the series so that we can provide the most responsive and useful information to various providers. Upon completion, please visit <https://www.surveymonkey.com/r/GreenlightSeries> and answer just a few questions regarding your experience of series.

WHY DID WE INITIATE THE GREENLIGHT SERIES?

Left untreated hepatitis C may lead to cirrhosis, liver failure, liver cancer, liver transplant or death. Hepatitis C is now causes more death in the US than all other infectious diseases combined. Hepatitis C is a major to the public’s health and well-being, **BUT it can be CURED**. Each of us plays a role in identifying and supporting patients with HCV. This series was initiated to assist help various healthcare providers in ‘greenlighting’ HCV into their medical systems.

Follow the GREENLIGHT HEPATITIS C series at SHAPEHCV.org for updates and new series installments.

GREENLIGHT Hepatitis C is a project of **SHAPE** (Supporting Hepatitis Awareness through Program Enhancement) of the Caring Ambassadors Program, Inc. a nonprofit organization empowering people to be ambassadors for their own health since 1997.
