Hepatitis C: State of Medicaid Access, 2017

HEPATITIS C AND OPIOID INJECTION ROSE DRAMATICALLY IN YOUNGER AMERICANS FROM 2004-2014

Source: Centers for Disease Control and Prevention and Substance Abuse and Mental Health Services Administration

- Among people aged 18-29, HCV increased by 400% and admission for opioid injection by 622%
- Among people aged 30-39, HCV increased by 325% and admission for opioid injection by 83%

“Hepatitis C is a deadly, common, and often invisible result of America’s opioid crisis,” said Jonathan Mermin, M.D., M.P.H., director of CDC’s National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention. “By testing people who inject drugs for hepatitis C infection, treating those who test positive, and preventing new transmissions, we can mitigate some of the effects of the nation’s devastating opioid crisis and save lives.”

Treatment and Prevention Services ²	#
Syringe Exchange Programs	9
Facilities providing substance abuse services	604
Facilities providing some Medication Assisted Treatment (MAT)	183 ...of which 113 accept Medicaid

HEALTHCARE ACCESS²

Healthcare Access	IL	US
Percent of People without Health Insurance	9.7	11.7
Percent Needing but Not Receiving Addiction Treatment	92.56	88.89
Number of 30 Days Supply of Opioids per Part D Enrollee	1.74	2.08
Opioids prescribed per capita, in morphine mg equivalents (MME)	426.78	642.05
